

Progress 2 Test Case:

Result:

- The code now has issues when being run due to trying to change the colours to suit the theme further, unfortunately I messed up even more.

New GUI

Reflection:

- The code has taken steps back and is now far worse than the original code I started, I decided to revert back to the old file and try and go ahead with that. However as previously mentioned many ideas surrounding other topics are flourishing and I feel this game may be better in something like Flutter or Swift for a resume project.
