

Progress 1 Test Case:

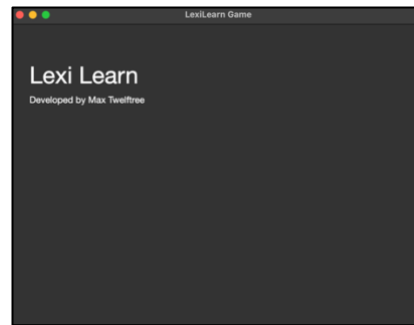

Result:

- The code runs fine and there aren't any issues. However, the start button has issues when it is pressed after multiple runs. Additionally, my name loads under 'Lexi Learn'.

See the following figures for a better idea:

Prior to the start button

After the start button

Reflection:

- The code ran as I hoped but due to limitations and < 100 lines of code being executed, limited functions and value is currently within the script. Furthermore I am unsure if I want to continue with the Lexi Learn game due to other ideas flourishing.
