Progress 15 Test Case:

Result:

- I believe I am almost finished. I added the notes I wanted to add from the previous progress file and have since added the light and dark mode back in but understand they may need removing again. The two modes are taking up a lot of time, where I have had to go through each UI figure and allow for the colour to be changed based on the light/dark button. The challenge mode was also changed greatly. (The changes made are in a video in the repository. I decided to remove and change some little things due to the number of issues it had in the code, music panel and other modes).
